

Scavenger Hunt for Earth Day

Head out to your backyard or a park. Bring your plastic shopping bag, with paper and crayons. If you decide to visit a Conservation area, please don't take anything home with you.

1. Look around and see if you can see 3 different types of trees. Make a tree bark rubbing with your crayons and paper. Do you know what kind of trees they are?
2. Can you see any birds? How many varieties? Can you describe them? Do you know their names? Can you draw one type of bird?
3. Now be very still and listen. What do you hear? Can you or your parents identify the different bird songs?
4. Do you see anything growing in the ground? What? List the names. They can be weeds or flowers.
5. Do you see any insects? What kinds? Can you name some insects that are good **pollinators**?
